

CEMEA Supported the Battery Value Chain Webinar for Secondary School Students as Part of the Young Constructors Cup

On **April 8, 2026**, our company **CEMEA** participated in a specialized webinar titled **Battery Value Chain**, focused on the development of battery technologies in Slovakia.

The webinar was designed for secondary school students involved in the **Young Constructors Cup** (Pohár mladých konštruktérov) initiative. It was organized by the [Automotive Industry Association of the Slovak Republic \(ZAP SR\)](#) in cooperation with the [Slovak Electric Vehicle Association \(SEVA\)](#).

As a member of SEVA, **CEMEA** was represented by our colleague **Karol Fröhlich** (Deputy Director and Research Director of CEMEA), who delivered [a presentation on the development of battery technologies in Slovakia](#).

We are pleased that CEMEA contributed to informing young people and that we were able to support the education of the next generation of technicians, as well as contribute to the discussion on the future of the automotive industry in Slovakia. **We would also like to thank the organizers** – ZAP SR and SEVA – for the invitation and the opportunity to present our activities.
